

CARE, WITH INTENTION.

Each HENAUZ lamp is hand-thrown in stoneware and assembled by hand. A few simple care practices will help preserve its ceramic surface, brass hardware, and electrical components over time.

CLEANING

Use a clean, soft, dry cloth for routine dusting. For marks on glazed ceramic, use a slightly damp cloth and dry immediately. Avoid abrasive pads, harsh cleaners, solvents, or chemical sprays.

BRASS HARDWARE

Brass finishes may naturally develop a subtle patina over time. Wipe gently with a soft, dry cloth. Avoid metal polish or chemical cleaners unless specifically recommended for your finish.

BULBS

Use the specified G8 Bi-Pin LED bulbs only. The lamp is supplied with three 2.5W, 2700K bulbs. Allow bulbs and hardware to cool completely before handling.

CERAMIC SURFACE

Variations in tone, texture, and surface are natural characteristics of a hand-thrown ceramic object. Handle with clean, dry hands and avoid impacts against hard surface

ELECTRICAL CARE

Always switch the lamp off and unplug it before cleaning, changing bulbs, or adjusting hardware. Keep the cord, plug, sockets, and dimmer away from water and moisture.

PLACEMENT

Indoor use only. Place on a stable, level surface away from excessive moisture, direct heat, and areas where the lamp or its 8 ft cloth-covered cord may be pulled or knocked.
